

The British Geological Survey

WHAT

For the southwest region's entrepreneurs, start-ups, and local businesses to experiment and identify new business opportunities with scientific data from the Tellus SW project

WHERE

University of Exeter, Penryn, Cornwall, TR10 9EZ

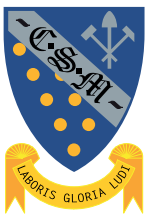

WHEN

18–19 September 2017

Tellus SW was a large environmental survey and research project funded by the Natural Environment Research Council. The project has gathered a large amount of scientific data that can benefit the economy, businesses and the environment in southwest England — www.tellusgb.ac.uk/

To maximise the impact of the data collected, the British Geological Survey and Exeter University, Camborne School of Mines are holding the TellusHow2Hack event to support start-ups and local businesses (SMEs) develop potential commercial applications. It will be a 2 day event where groups come together to prototype business ideas using the TellusSW data with support from BGS data experts.
